Subject: FDA food-contact status — Rollerflex[®] 4000 and 9000 series hose

To Whom It May Concern:

This letter describes the food-contact status of Rollerflex[®] flexible PVC hose manufactured by Superflex Ltd. for food, beverage and potable-water applications.

The ingredients selected to formulate the compounds used in Rollerflex 4000 series and Rollerflex 9000 series hose are either generally recognized as safe (GRAS), prior-sanctioned, the subject of an effective Food Contact Notification (FCN) or Threshold of Regulation (TOR) exemption, or identified in one or more of the following sections of Title 21 of the Code of Federal Regulations published by the U.S. Food and Drug Administration: 21 CFR 178.2010, 178.3297, 178.3740, 178.3770, 181.5, 181.27 and 181.28.

The ingredients selected are acceptable for contact with all food types, provided that the temperature does not exceed 100 °C (212 °F) or the maximum recommended working temperature of the hose, whichever is lower. Rollerflex 4000 series hose is additionally formulated to meet the requirements of NSF/ANSI Standard 51 (food equipment materials) and NSF/ANSI Standard 169.

The hose listed above may be used in the production of food-contact articles in the United States, provided that the terms and conditions of the applicable FDA regulations, FCNs, prior sanctions, TOR exemptions and GRAS determinations are met, and provided the finished food-contact article meets any applicable limitations on extractives. Determination of suitability for a specific end use, including cleaning-in-place chemicals and temperatures, remains the responsibility of the user.

This information is provided in good faith and is accurate to the best of our knowledge as of the date above. It is based on our own formulations and on written declarations from our raw-material suppliers, is subject to change as regulations and supplier data are updated, and is offered to assist the recipient's own compliance review rather than as a warranty. Please contact Superflex Ltd. for a statement covering specific part numbers or a later revision of the regulation.
